12 Best Assorted Large Peony...$1.25

Bushcherries Are Fruitful

Hansen Select Bush Cherries are the result of over 30 years of untiring selection work by the great plant wizard, Prof. N. E. Hansen at South Dakota State College at Brookings. He has developed what was formerly the rather small, little known western South Dakota Sand Cherry, to a fruit of large size, desirable taste and bearing from the ground up, usually bearing the year after planting. The fruit is good to eat from the bush and makes a wonderful jam. The juice makes fine jelly and a not to be forgotten cordial which won't keep long.

Though the fruit of this cherry much resembles a plum in size and shape, the plant itself grows in a bush like shape, branching and bearing from the ground up, usually bearing the year after planting. It always retains its dwarf stature which is of prime value for planting in the garden as it does not take up near the room of an ordinary plum tree and yet often bears more than the latter. The bushes should be planted 2 to 4 feet apart in rows 4 to 6 feet apart about 25 or more to every home garden.

In landscape planting a few of the bush cherries are very desirable as they are dwarf and bushy and so a great aid in foundation covering planting work. While the foliage itself, a beautiful silvery green, turning a rich red and gold in fall, adds a very desirable

Hansen Select Bush Cherries

EASY TO GROW—SURE TO PRODUCE

A Desirable Good Fruit and Ornamental for Extensive Planting Everywhere

Hansen Select Bush Cherries are the result of over 30 years of untiring selection work by Prof. N. E. Hansen at South Dakota State College at Brookings. Each, 75c; Per 10, $6.50; Per 25, $12.50; Per 100, $35.00

Strong 2 to 3 Ft. Size
Each, 50c; Per 10, $4.00; Per 25, $8.75; Per 100, $25.00

Branched 18 to 24 inch
Each, 35c; Per 10, $2.50; Per 25, $5.00; Per 100, $15.00

Plant these Hansen Select Sand Cherries Because:

1. They are easy to grow and perfectly hardy everywhere.
2. They are good to eat, and make delicious preserves.
3. Their silvery green and glossy foliage is a most attractive feature in the garden or as a hedge or ornamental shrub.
4. They are desirable for foundation planting, as they retain their dwarf stature and do not take up much room.
5. They are a valuable addition to the ornamental garden, as they add beauty and interest with their profuse masses of white flowers in early spring, which completely cover the bushes, and with their clusters of large, edible fruit, which ripens in early fall and provides a delicious source of native fruit.

Masses of Fruit

Bushcherries Are Ornamental

SIBERIAN FLOWERING CRAB

The Beautiful Windbreak Ornamental
FRUIT TREE—SHADE TREE

The new and improved Siberian Flowering Crab or Pyrus Baceata from the cold dry regions of Siberia is a striking tree for ornament and utility. It must be seen and used to be fully appreciated.

Its glorious, early spring loveliness adorned in an avalanche of large pink and white flowers of Siberia is a striking tree for ornament and utility. It must be seen and used to be fully appreciated.

break, it gives the whole place a living frame of beauty. It must be seen and used to be fully appreciated.

branches making it a fine shade tree for the street or lawn and affording ample space under its large spreading bough. "For many lawns parties beneath the canopy of green."

The blossoming is followed by a mass of dense blight green foliage covering heavily shouldered branches making it a fine shade tree for the street or lawn and affording ample space under its large spreading bough. "For many lawns parties beneath the canopy of green."

In All Its Springtime Glory

Per each, 3 to 4 ft.; $3.50; Per 10, $25.00.
Per each, 4 to 5 ft.; $5.00; Per 10, $50.00.

Then comes the bright red and yellow fruits which can be used as pickles or are best pressed out and then the juice used as the desired added flavor in other fruit jams and in jellies to bring out their full value. The juice also makes good cider.

The tree itself grows to a good height and lives long. Its growth is rapid, sturdy and vigorous. It is very drouth and disease resistant and because of its origin is absolutely hardy everywhere. Its strong sturdy growth with extra well branched limbs and strong crotches makes it especially fine as a windbreak stock.

For a beautiful specimen ornamental lawn tree, a boulavard street tree, fruit tree—Siberian Flowering Crab should be extensively planted everywhere, yet, because of its very low price, may be used as needed protection and abundant beauty in one or two rows of your windbreak.

Let Us Save You Money on Farm Seeds

COSSACK ALFALFA—The Greatest Of All!

Prof. N. E. Hansen's Wonder Plant

This marvel of all Alfas is absolutely hardy on our most exposed prairies. Does well and produces abundant forage and seed in the driest of years.

It was introduced from Siberia by the Plant Wizard, Prof. N. E. Hansen, and will withstand our severest winters and give a wealth of forage and hay every summer.

Cossack is hardier and will produce more good forage year after year than any other alfalfa. Even in the driest of years Cossack will produce a crop of forage seed where other less vigorous sorts will not, and often die out, as Cossack is native with little or no snow. An Alfalfa that will stand up and produce under conditions where, yet, because of its very low price, may be used as needed protection and abundant beauty in one or two rows of your windbreak.

HANSEN PROSO—The Grain Of The Age!

The Best Catch Crop For The Northwest

Hansen Proso is destined to a great future and the time is not far off when it will be one of the major grains of commerce. It is easy to grow, does well on poor soil, is a good weed killer, as it should be sown in late June for the best results.
